Course Description

This course examines the purpose and application of assessment within the five essential components of reading (phonemic awareness, phonics, fluency, vocabulary, and comprehension) and how they relate to the strands of Scarborough's Reading Rope (2001). Candidates identify and administer research-based literacy assessments for a variety of purposes and use assessment data to inform intervention and instruction in the form of a structured literacy lesson. The course includes components of state requirements for certification.

Course Resources

Required and recommended resources to complete coursework and assignments are found on the course [Reading List](#). Access is provided through the Reading List link in your online course as well as from the library homepage ("Find Your Reading List" button).

Note: Required resources that must be purchased by the student are tagged "Purchase from a vendor of your choosing." Required resources with a direct link, "Available through CityU Library", are available at no cost to students.

Students in Canada will see required resources they need to purchase tagged "Purchase from the Canadian Bookstore." Students outside the U.S. and Canada should contact their advisor or textbook coordinator for additional information.

Course Outcomes

As a result of this course, students will know or be able to do the following:

- Develop understanding of the different types of reading assessments (screening, diagnostic, progress monitoring, summative) and the purpose of each.
- Administer research-based assessments as appropriate for a specific subgroup or individual student and analyze results in order to develop appropriate interventions.
- Develop understanding of how assessment informs whole class instruction as well as differentiation for specific subgroups and individual students (multilingual learners, students with dyslexia, students below or far below grade level in reading).
- Integrate knowledge of the Simple View of Reading (SVR) and Scarborough's Reading Rope (2001) when designing and implementing appropriate interventions in response to assessment data.

- Design a structured literacy lesson plan that addresses the needs of a specific student subgroup or individual student based on assessment data.

Shared Agreements

Our primary commitment is to **build relationships** both with each other and within ourselves. We share a **collective goal** of becoming critically conscious educators who are prepared to serve all students in our classrooms. A positive learning experience relies on creating an atmosphere where space is held for **multiple truths** to coexist, and where we begin to **notice and name power dynamics** in our own group and also in the education system, its processes, and its policies. We acknowledge that differences among our identities, social backgrounds and experiences will influence our perspectives and those of others. We agree to **share our truths bravely**, to **acknowledge the humanity** of each other and ourselves, and to **look for learning** in ourselves and others.

We agree to keep confidential all issues of a personal or professional nature that are discussed in class.

Course Assignments and Grading

Literacy Assessment and Intervention Assignment (40% of Final Grade)

In this assignment, candidates select two students and administer one research-based assessment (screening or diagnostic) for each student from within the five essential components of reading (phonemic awareness, phonics, fluency, vocabulary, and comprehension). Candidates then analyze the assessment data, develop a brief student profile (strengths, areas for growth), and discuss, with the support of evidence-based literacy research, how the data applies to Scarborough's Reading Rope model and the integration of skills that lead to overall reading proficiency. Finally, candidates develop a one-week intervention plan outline to address the specific needs of each student based on the assessment data.

Intervention Lesson Plan and Rationale (40% of Final Grade)

In this assignment, candidates develop a structured literacy lesson plan based on student assessment data in order to address one area of growth for a specific student or sub-group of students. Lesson plan includes a rationale that supports instructional decisions using research-based evidence (minimum of 4 resources) and a reflective analysis.

Participation, Engagement, and Essential Dispositions (20% of Final Grade)

Candidates should participate and engage in all classwork, including required assignments, class discussions, activities, and instructor-determined assignments. Candidates should work to meet essential dispositions criteria not only in the field, but also in their coursework, whether online or in person. The course instructor will provide assignment details and grading rubrics.

Course Policies

Participation will be graded based on engagement in class discussions and activities (both online and mixed modes). Online-only courses will be determined via active engagement in weekly discussion boards or other interactive opportunities provided by the instructor. Mixed

mode courses will be determined based on presence in class and engagement with content and peers both within and outside of face-to-face class sessions.
