OVERVIEW OF COURSE GRADING

The grades earned for the course will be derived using City University of Seattle's decimal grading system, based on the following:

<i>Overview of Required Assignments</i>	<i>% of Final Grade</i>
Course Activities	30%
Annotated Bibliography	5%
Movie review	15%
Literature review	20%
Reflection paper on a writing process	30%
TOTAL	100%

SPECIFICS OF COURSE ASSIGNMENTS

The instructor will provide grading rubrics that will provide more detail as to how this assignment will be graded.

Course Activities

Class participation through discussion activities is an integral part of this course. To provide a structure for balanced participation and allow students to maximize the benefit of the discussion activities, it is

required to follow these guidelines: 1) Post responses to discussion questions in the first three days of the school week (Monday through Wednesday in online classes; various days in mixed-mode classes). 2) Post at least four or more thoughtful and topic-relevant comments to responses made by classmates over at least three different days of the school week. 3) Respond to any questions that the instructor has regarding students' original post by the end of the school week.

<i>Components</i>	<i>% of Grade</i>
Timeliness of responses	15%
Quality of responses	70%
Quantity of responses	15%
TOTAL	100%

Annotated Bibliography

Students will prepare an annotated bibliography of the sources that they have found relevant for writing a major paper for any psychology class that they are currently enrolled or will take in a future. Students will have to find at least five different sources relevant to the topic of their paper – including articles from the scholarly journals, books, and the Websites. In one- to two-page bibliography, students will present the title of the paper, a one- to two-paragraph summary of the paper, and the annotated list of sources they are planning to use.

<i>Components</i>	<i>% of Grade</i>
Purpose/Thesis Statement	15%
Requirements	25%
APA Style (Citations, References, Document Formatting)	60%
TOTAL	100%

Movie review

Using the outline below, students will write a five- to six-page review of the movie that deals with social issues: 1) A brief overview of the content, story line, and themes; 2) Identification of social aspects that are mirrored in the film; 3) Evaluation and analysis of the movie from a social point of view, with the use of social concepts; 4) Summary of your findings and description of changes in your beliefs and attitudes about this social problem.

Students are expected to utilize Turnitin.com (<http://turnitin.com/>) and Smarthinking (<http://www.smarthinking.com/>) services to write this paper. Feedback gathered from turnitin.com and smarthinking.com must be used for correcting first draft of the movie review. In order to receive a grade, students are expected to submit to their instructor the following: 1) First draft of the paper; 2) Turnitin.com report; 3) Smarthinking.com report; 4) Annotated bibliography; 5) Final paper with included necessary edits and corrections based on the feedback received from turnitin.com and smarthinking.com. All items should be saved into one document, with items 1-4 attached at the end of the paper in the form of appendices.

Students may choose a movie from the list of recommended movies or they may review a movie of their own choice. In their reviews, students are expected to combine their own thoughtful analysis with ideas and information found in a minimum of three other sources. Therefore, as in any scholarly writing, students should not merely copy information from another author, but use evidence to support the contentions they have drawn from their findings and critically analyze related literature - this paper has to be an analytical paper, not a summary of readings. This paper must meet APA requirements of format and style. Students must cite the sources of all ideas, facts, and information used that are not their own, even if

they have put the information into their own words. Failure to do so is plagiarism, even if the oversight is unintentional.

PLEASE NOTE: Students' paper should not be limited to a summary of the movie. In fact the summary of the plot should be very brief. It should not be a cognitive assessment or evaluation of the film's production, or accuracy either.

DAS-U-Style and mechanics	20%
DAS-U-Analysis and use of course concepts	30%

Literature review

Students will choose a social science theorist whose ideas they would like to explore and conduct a literature review on the work of that theorist. They are to select four readings (journal articles, magazine articles, books, or book excerpts) either written by the theorist or by another author writing about the work of the particular theorist. Students should read about the theorist's ideas, not about his/her life. The readings should address the application of theory to real life and/or present research conducted in relation to that theory. For example, literature on the work of Carl Jung might discuss the application of personality typology in various settings. Literature on Emile Durkheim could discuss the application of his theory to the field of sociology or criminology.

In an eight- to ten-page paper, students will present a synopsis of the focus of each reading. They will include main ideas, and for readings on research conducted, describe the investigation, participants, methodology, results, and the discussion of the results. Students will describe how the topics discussed or investigated apply to everyday life situations. They will also provide their own critical analysis of the theorist's ideas, considering factors such as their usefulness, application across cultures, and how much of a contribution they have made to understand social phenomena.

In their papers, students are expected to combine their own thoughtful analysis with ideas and information found in the sources they selected to use. Therefore, as in any scholarly writing, students should not merely copy information from another author, but use evidence to support the contentions they have drawn from their findings and critically analyze related literature - this paper has to be an analytical paper, not a summary of readings. This paper must meet APA requirements of format and style. Students must cite the sources of all ideas, facts, and information used that are not their own, even if they have put the information into their own words. Failure to do so is plagiarism, even if the oversight is unintentional.

Reflection paper on a writing process

Using the concepts covered in this course, students will write five- to six-page, double-spaced paper describing their experience and reflections on the process of writing academic papers. Using their

experience with creating a movie review, students are expected to describe the steps of writing a paper (including their use of Turnitin.com and smarthinking.com services), summarize major aspects of their development as writers, and reflect on what they have learned during this process. In their reflections students are expected to combine their own thoughtful analysis with ideas and information found in a minimum of three sources. Therefore, as in any scholarly writing, students should not merely copy information from another author, but use evidence to support the contentions they have drawn from their findings and critically analyze related literature - this paper has to be an analytical paper, not a summary of readings. This paper must meet APA requirements of format and style.
