Emphasis is placed on the skills necessary to align assessments with common core standards and learning targets, to inform future instructional decisions, and how to provide effective feedback to students. Candidates will use self-reflection to analyze and inform their own assessment practices. This course includes components of state requirements for certification.

- Design and use a variety of formative and summative assessments that measure student performance relative to learning targets

Shared Agreements

Our primary commitment is to **build relationships** both with each other and within ourselves. We share a *collective goal* of becoming critically conscious educators who are prepared to serve all students in our classrooms. A positive learning experience relies on creating an atmosphere where space is held for *multiple truths* to coexist, and where we begin to *notice and name power dynamics* in our own group and also in the education system, its processes, and its policies. We acknowledge that differences among our identities, social backgrounds and experiences will influence our perspectives and those of others. We agree to *share our truths bravely*, to *acknowledge the humanity* of each other and ourselves, and to *look for learning* in ourselves and others.

We agree to keep confidential all issues of a personal or professional nature that are discussed in class.

Grading Scale

The grades earned for the course will be calculated using City University of Seattle's decimal grading system, found in the current University Catalog (<https://www.cityu.edu/catalog/>).

Grading rubrics with details on how each assignment will be graded are located under *Assignments* and/or in *My Grades* in the online course menu. Students should review the rubric for each assignment prior to completing their work in order to understand how it will be assessed.

Course Assignments and Grading

Effective Questioning Action Plan (25% of Final Grade)

Candidates will generate a list of at least ten questions aligned to state-adopted standard(s) or related learning targets. Questions should reflect a broad range of cognitive levels and types (e.g., pre-assessment, divergent, open-ended, etc.). Candidates analyze question structure and develop an action plan to address how to: 1) implement questions equitably, 2) engage many

students in responding, 3) elicit and build on student responses, and 4) encourage student to student talk. In this analysis and action plan, candidates should explore a hypothetical or actual discourse with students in response to 1-2 questions. The action plan should take into account candidate's existing strengths and growth areas. Candidates and/or the instructor may opt to complete this assignment as a paper, transcript with analysis, video with analysis, oral presentation, or PowerPoint with associated diagrams, tools, scaffolds, or supports.

Assessment Matrix Paper (25% of Final Grade)

Candidates generate a variety of assessments aligned to a state-adopted standard, and reflect on challenges and benefits to implementing those assessments. Candidates unpack a standard into four learning targets at a variety of cognitive levels. For each target, candidates create pre-, formative, and student voice assessments of an appropriate rigor. Candidates create a summative performance assessment with associated rubric that addresses the overall standard. The final product will be a matrix with the assessments, and a 1-2 page paper reflecting on benefits and challenges of implementing such assessments in classroom settings.

Student Work Analysis and Feedback (30% of Final Grade)

Candidates will analyze a data set and associated student work sample in a 5-page paper. Candidate will describe trends in strengths and needs for the larger group of students and the individual student represented by the work sample. Candidates will either evaluate the feedback on the student work sample, or provide appropriate and relevant feedback. Lastly, candidates will describe a plan for how they will help the group and the individual student to understand and use the feedback provided, as well as next steps in instruction (or changes to the assessment) that are informed by the analysis. This assignment reflects many requirements from Task 3 of the edTPA performance assessment for teachers. The instructor will provide a variety of data and work samples, or the candidate may use data and work samples from field experience.

Participation, Engagement, and Essential Dispositions (20% of Final Grade)

Candidates should participate and engage in all classwork, including required assignments, class discussions, activities, and instructor-determined assignments. Candidates should work to meet essential dispositions criteria not only in the field, but also in their coursework, whether online or in person.

Course Policies

Participation

Participation will be graded based on engagement in class discussions and activities (both online and mixed modes). Online-only courses will be determined via active engagement in weekly discussion boards or other interactive opportunities provided by the instructor. Mixed mode

courses will be determined based on presence in class and engagement with content and peers both within and outside of face-to-face class sessions.
